

In re Patent Application of:

DE LAURENTIIS ET AL.

Serial No. **10/679,943**

Filing Date: **October 6, 2003**

In the Specification:

Please replace paragraph [0027] on page 7, with the following rewritten paragraph:

The novel architecture of the present invention does not require sub-circuits to be switched in or out of the functional amplifying circuit at each transition of the signal A. The digital signal A is desirably amplified with an enhanced gain coinciding with ~~of~~ the signal transitions compared to the gain when the digital signal remains in the same state.
